Time: Recording available beginning 7:00 AM EDT

Webcast Link: [Click Here](#)

The recorded presentation will also be available for 90 days on Aadi's website within the [News/Events & Presentations](#) section.

About Aadi Bioscience

Aadi is a biopharmaceutical company focused on precision therapies for genetically-defined cancers. Aadi's primary goal is to bring transformational therapies to cancer patients with mTOR pathway driver alterations where other mTOR inhibitors have not or cannot be effectively exploited due to problems of pharmacology, effective drug delivery, safety, or effective targeting to the disease site. In November 2021, Aadi received FDA approval for FYARRO™ for the treatment of adult patients with locally advanced unresectable or metastatic malignant perivascular epithelioid cell tumor (PEComa), and in February 2022 Aadi announced the commercial launch of FYARRO in this indication.

Based on data from Aadi's Phase 2 registrational study (the Advanced Malignant PEComa Trial or "AMPECT") with FYARRO, and, following discussions with the FDA about other emerging data with FYARRO, Aadi has initiated PRECISION 1, a Phase 2 tumor-agnostic registrational trial in mTOR inhibitor-naïve solid tumors harboring *TSC1* or *TSC2* inactivating alterations. More information on Aadi's development pipeline is available on the Aadi website at www.aadibio.com.
